

MISSION MASKS

Masks that mean *more*.

OUR MISSION

Is Simple.

*To place high-quality masks in the hands of America's Businesses.
Quickly.*

Mission Masks is creating custom embroidered masks,
while donating 5% to American Non-profits.

Backed by the Nation's largest embroiderer of American Flags,
our promise is 100% American manufacturing, timely shipments,
quality embroidery, & a lifecycle that means *more*.

"As we are faced with these unprecedented times, many companies will face challenges in their mask supply over the next year.

Production will be inadequate, overseas deliveries will be delayed, & sacrifices in quality will be made. The massive environmental impact of billions of disposable masks unleashed into our landfills, oceans, & beyond, cannot be underestimated. This is why we sought to create a safe, spacious, & reusable alternative."

Larry Severini

CHALLENGES

SUPPLY

Unsustainable supply means companies will be forced to purchase sub-par masks at excessive prices.

DELAYS

A key challenge, domestically & abroad, is excessive production & wait times. Many overseas shipments continue to be rejected.

IMPORTS

Seeking replenishment overseas, challenges – from customs holds to the weakening American business – arises.

SACRIFICE

Sadly, urgency to satisfy corporate, state & national demands are leading to inferior materials & low-quality manufacturing.

COST

Disposable masks cost companies 8x of what they can save with sustainable, rewashable & attractive fabric masks.

NATURE

The detrimental impact of disposable masks on environment is massive. A large brand will dispose of roughly 10M in 1Year.

INSTEAD, SAVE *REAL DOLLARS*

A highly-regarded brand with 90,000 national employees, was set to spend 9M over the course of 2020 on non-descript, disposable masks.

That's until they realized they could locally access much higher-quality, custom branded masks for 1.25M.

A savings of 7.75M.

PRESERVE OUR ENVIRONMENT

Even the most well-meaning organizations will produce millions of pounds of waste in disposable masks.

The solution is to make masks washable. Increase sustainability more with Repreve – an innovative, base fabric made completely from recycled bottles – to fully align Company Needs with the Environment.

BOLSTER *YOUR BRAND*

In times like these, Corporate morale & satisfaction can plummet.

Your mask is your voicebox. Instead of generic masks, benefit from on-brand style and aesthetic.

Whether for Corporate Clients or Staff, Company Gifts or Merchandise, make sure your brand is easily represented inside & outside of physical buildings.

SUPPORT AMERICAN MADE

Manufactured by the largest embroiderer in all of America, we ensure a product 100% made on American soil with top-of-the-line materials, machinery, & workmanship.

Having already donated thousands of masks & gowns to hospitals, EMTs, fire & police, we are passionate about supporting American business.

Join us.
